

Title:	BSc (Environmental Biology) Stage 3 Scholarship
Award Type:	Scholarship
Programme Description:	Science
Long Description:	<p>The scholarship for each subject is awarded in Stage 3 to the student of that subject with the best performance in the subject area in Stage 2, provided the student obtains a GPA of 3.68 or higher in that subject area and is progressing into that subject area in Stage 3. A subject area is defined by modules that a student must take in Stage 2 to proceed within that subject to degree level. Information on these modules can be found in the course curriculum.</p> <p>The Science Programme Office will contact Schools following the Summer examinations regarding the names of the School nominees for these scholarships. Students will not be eligible for more than one scholarship.</p> <p><b>Transfer Credits</b> Students with transfer credits may be eligible for a Scholarship within their Subject areas in competition with students in the Discipline/Subject Concentration/Single Major provided the candidate has taken at least 50% of the core and option modules required in the subject area, obtains a GPA of 3.68 in the modules they have completed in their subject area and obtains first place when compared with students in the Discipline, Subject Concentration or Single Major areas across the modules taken in that subject area.</p> <p>The scholarships have a value of EUR 1,000 per subject/discipline (unless otherwise stated). All candidates for scholarships must be students within the UCD BSc Science programme (unless otherwise stated). Where two or more students are eligible for a scholarship, based on their GPA in their discipline, the School can decide to award the scholarship to the student with the higher Stage GPA</p>
Value:	1,000
